Summary

I am a Full Stack Developer with 7 years of experience in working with MERN and Java Spring boot Tech Stack where I have played a key role while working on several noteworthy projects.

I am well versed with and proficient in working with technologies like HTML 5, CSS 3, Vanilla JS, Typescript, jQuery, React JS, Next JS on the front-end and MongoDB for our NoSQL database, PLSQL for RDBMS and NodeJS, Express, NestJS on the back end. I am comfortable in Monolithic, Microservices and Event driven Architecture. I am also comfortable in deployment using GitHub Actions on AWS S3, EC2, Amplify or any third-party server using Nginx web server. I am also web versed with JWT Token generation of user, Hashing of password, Asymmetric Encryption for secure data.

Experience

Senior Software Engineer

VUI Innovate

Jan 2024 – Present

- Built a responsive apparel website named Laurenethan.com using MERN Tech Stack.
- Built an automation tool to Signup, Login in Instagram and follow, like and post a comment on a celebrity Instagram page using Java Selenium.
